Subject: Sewer Issue

Statement of Presentation you wish to make and statement of action you wish Council to take.

Solve a sewer issue at 2003 Hwy 54 East (27713) and present to council a solution to expand the improvements on the site. Your Water Management Department, Donald F. Greeley has been very ineffective and lackadaisical about the situation. The original sewer access is not effective and not according to good development principles. Your city management has been unwilling to discuss a reasonable solution and have failed to cooperate with us in many issues. Instead, Water Management has made efforts to further complicate my situation and cause issues with other departments within the city government. I will present the situation and give a reasonable solution to the matter.
